## I-FRAME LINKS

### I-Frame Components Components

Overnight has created 11 "I-Frame solutions" that our retailers can use to easily and quickly "plug in" to their existing websites under any desired categories. For example, if a retailer installs the Overnight Engagement ring I-Frame and sets the link to appear under their web-site as Engagement Rings, then any consumer that clicked on "Engagement Rings" on your Website would instantly access all of Overnight engagement ring styles - without ever leaving the retailer's site! [Click here](#) to go to our sample site, then click Engagement Ring to see how our I-Frame function within a website.

All subcategories within engagement rings would appear as options and when specific items were selected, the consumer would be able to view accurate, daily triple-key pricing, in multiple metals and diamond qualities. Once a consumer chooses an item in a desired metal and diamond quality - the retail jeweler would have full control of when and if to place that order with Overnight.

I-FRAME IS DESIGNED FOR THOSE COMPANIES WHO HAVE WEB DEVELOPER OR IT PERSON WITH SOME PROFESSIONAL WEB DEVELOPING EXPERIENCE.

Please follow this 3 step process to install any or all of these I-Frame solutions into your website:

- Step 1) Create an I-Frame tag on an empty page within your existing website;
- Step 2) Copy the below any one url into the I-Frame <src> attribute;
- Step 3) Set a navigation link on your website into the IFrame page.

[Click here](#) to see full resolution demo on a customers iframe

Most Popular Iframe links

8. Click on the “Web Solutions” link in the main navigation section.

The screenshot shows the OverNIGHT website's main navigation bar. The 'WEB SOLUTIONS' link is highlighted with a red box. A red arrow points from this link to a red box containing the text 'Click here for all options'. The website header includes the OverNIGHT logo, navigation links (NEW STYLES, WEB SPECIALS, SAMPLE PROGRAMS, SEARCH BY STONE, CUSTOM CRAFTED, WEB SOLUTIONS, DIGITAL LIBRARY), and a search bar. Below the navigation bar, there are categories: ENGAGEMENT RINGS, WEDDING BANDS, FASHION RINGS, BRACELETS, PENDANTS, NECKLACES, EARRINGS, COLLECTIONS, and DIAMONDS. The main content area features a large banner for 'Lab Grown DIAMONDS' with a list of bullet points: '1,000's of certified center stones in all shapes & sizes', 'Melee from 1mm and up in VS2-SI1, F-G', 'Instock and available for next day delivery', and 'Order Loose or Set into any of our mountings'. It also mentions 'Free shipping on all Lab Grown Orders thru 12-31-19!' and '10 DAY MEMO ON ALL LAB GROWN DIAMONDS'. The banner includes logos for the International Gemological Institute (IGI) and GCAL. To the right of the banner is a large image of various lab-grown diamonds and tweezers, with a callout saying 'NO RISK! FREE SHIPPING 10 DAY MEMO' and a button 'VIEW TODAY'S INVENTORY'.

## WEB SOLUTIONS

Overnight offers various solutions to help our retailers capture more online business. [Click here](#) to download details, or Click link below or on the left panel to start.

### Solution 1 - Custom Download & Preset Category Downloads

This option is for those customers who already have an established website and would like to download images and breakdowns for their existing site. Our customers have the ability to grab preset categories instantly or customize your download by choosing any category or sub categories that may suit your specific needs. This option requires some technical support on your end to upload all of the info and image to your site. This option provides a self-contained package zip file that consists of an excel data spreadsheet, as well as all images of your selected category. You can unzip all files to your computer; the excel file can be saved as universal "csv" file for further integration with whatever technology the customer is using. Downloaded products files will be saved under "My Account - Preset Category & Your Downloads" for archiving purposes.

**Solution 2 - Create an i-Frame Solution** ← **Click on Create an i-Frame Solution**

For customers with technical staff or outside internet contracting services, this option creates an i-Frame link to our products. Products will appear as a "Frame" within our customer's existing web site. Basically, customers insert a link such as "Signature Collection" on their website, when clicked, an i-frame will link our products to customer's website giving the consumer the ability to view more product while staying on our customers website. Dynamic pricing is available for all items with this solution. Consumers can change metal, color, diamond quality or size and have it price out instantly at current metal markets. Sample code and sample site are provided on the i-frame detail page.

10. Look below for the landing page for I-Frame Links. All main category links are listed here. You can use any category URL for your I-Frame

### I - FRAME LINKS

**I-Frame Components Components**

Overnight has created 11 "I-Frame solutions" that our retailers can use to easily and quickly "plug in" to their existing websites under any desired categories. For example, if a retailer installs the Overnight Engagement ring I-Frame and sets the link to appear under their web-site as Engagement Rings, then any consumer that clicked on "Engagement Rings" on your Website would instantly access all of Overnight engagement ring styles - without ever leaving the retailer's site! [Click here](#) to go to our sample site, then click Engagement Ring to see how our I-Frame function within a website.

All subcategories within engagement rings would appear as options and when specific items were selected, the consumer would be able to view accurate, daily triple-key pricing, in multiple metals and diamond qualities. Once a consumer chooses an item in a desired metal and diamond quality - the retail jeweler would have full control of when and if to place that order with Overnight.

I-FRAME IS DESIGNED FOR THOSE COMPANIES WHO HAVE WEB DEVELOPER OR IT PERSON WITH SOME PROFESSIONAL WEB DEVELOPING EXPERIENCE.

Please follow this 3 step process to install any or all of these I-Frame solutions into your website:

Step 1) Create an I-Frame tag on an empty page within your existing website;

Step 2) Copy the below any one url into the I-Frame <src> attribute;

Step 3) Set a navigation link on your website into the IFrame page.
